

1. Poya turi va u mansub o'simlik namunasi o'rtasidagi muvofiqlikni aniqlang: birinchi ustunda berilgan har bir pozitsiya uchun ikkinchi ustundan mos pozitsiyani tanlang.

Poya turlari	O'simliklar
Sudraluvchi	A) Makkajo'xori
O`raluvchi	B) Loviya
Tik	D) Qulupnay
O`raluvchi	E) No'xat

2. Insert the missing words from the proposed list into the text "Field Tubes" using numerical designations. Write the numbers of the selected answers in the text, and then write the resulting sequence of numbers (according to the text) in one line.

SILATED TUBES

The sieve-shaped tubes are a vertical series of elongated _____ (A) cells, whose transverse walls are perforated, the nuclei in these cells are _____ (B), and the cytoplasm is adjacent to the membrane. This is _____ (B) lub tissue through which _____ (G) solutions of substances move.

List of words: Organic Mineral Large Destroyed Live Dead Leading Mechanical.

3. Oltita javobdan uchtasini tanlab, ular ostidagi raqamlarni yozing. Suvda erigan organik moddalar:

- 1) elaksimon naylar bo'ylab
- 2) pastdan yuqoriga
- 3) yog'och bo'yicha
- 4) tomirlar bo'yicha
- 5) yuqoridan pastga
- 6) lub bo'yicha.

4. Answer the question:

1. The inner part of the stem's crust consists of cells

Choose one answer:

1. mechanical fabric
2. the formation tissue
3. conductive tissue
4. covering fabric

2. The inner part of the stem's crust is called

Choose one answer:

1. cambium
2. stopper
3. wood
4. Lub

3. The sieve-shaped tubes

Choose one answer:

1. downward flow of organic substances
2. the upward current of water from the root
3. downward flow of water from the leaf
4. ascending current of organic matter

4. The vessels provide

Choose one answer:

1. downward flow of water from leaves
2. the upward current of water from the root
3. the ascending current of organic matter from the root
4. downward flow of organic matter from leaves

5. The heart is represented by cells

Choose one answer:

1. conductive tissues

2. cambium

3. formation tissue

4. basic fabric
